

# Be Guidelines Smart

CCNAP Be Guidelines Smart Toolkit is developed to ensure that all nurses and allied professionals are trained to use the latest ESC Guidelines.

# Why is Guideline Implementation Important For Nurses & Allied Professionals?

- Nurses & Allied Professionals spend longer with the patient than other healthcare professionals.
- We have an opportunity to evaluate current care against Guidelines recommendations.
- We have an important role as patient advocates.

# Reflective Questions For Individual Nurses & APs

Are the patients I care for receiving Guideline-based care?

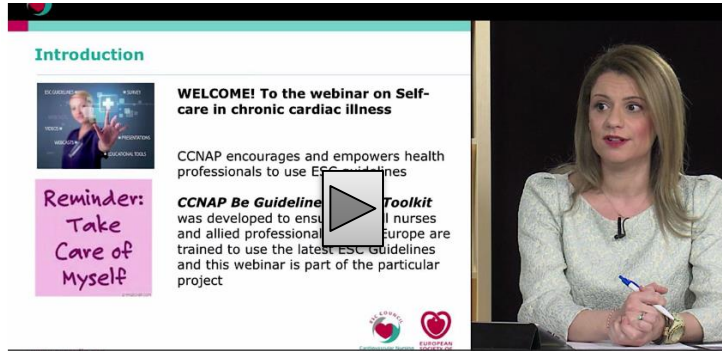

If not, why?

- Lack of knowledge?
- Inadequate infrastructure? (finance, legislation, time)
- Workplace Culture?

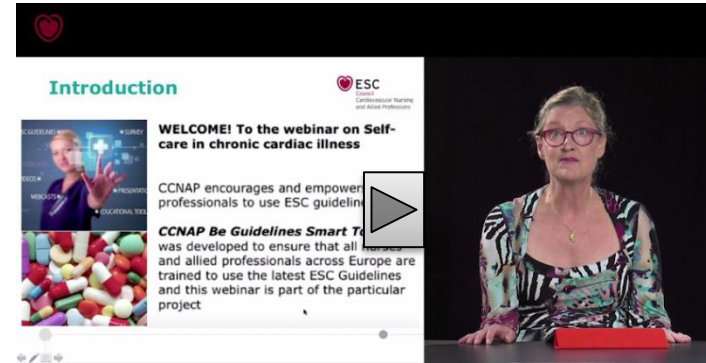

What can I do to overcome these barriers?

Where can I get help?

# Webinars

Optimising Self-Care in Chronic Illness

Adherence to treatments for  
dyslipidaemia & cardiovascular disease

# Filmed Clinical Scenarios:

7 videos [online](#), including new videos on CVD Prevention in Primary Care and on Heart Failure.

The image shows a screenshot of a YouTube video player. The main video frame displays a woman in a blue clinical uniform sitting at a desk in an office. She is holding a colorful patient education leaflet. A large play button is overlaid on the center of the video. The video player interface includes a progress bar at the bottom showing 5:07 / 5:34. To the right of the video player is a playlist titled 'CCNAP Toolkit videos' by the European Society of Cardiology, containing 6 videos. The first five videos are listed:

- 1 CCNAP Toolkit videos - 00 - Introducing the Guidelines Implementation Programme
- 2 CCNAP Toolkit videos - 01 - Having the Confidence
- 3 CCNAP Toolkit videos - 02 - Modelling Good Practice
- 4 CCNAP Toolkit videos - 03 - Guidelines Implementation, whose job is it?
- 5 CCNAP Toolkit videos - 04 - Hearing the Patient's Voice

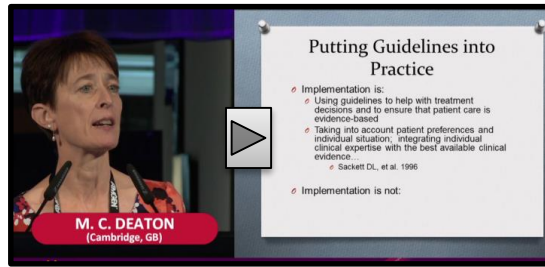

The sixth video, 'CCNAP Toolkit video - 05 - CVD Prevention in Primary Care', is partially visible at the bottom of the playlist.
